You'll like the way we see you!

Hello and thank you for taking time to read this letter. I learned about this product in June 2013 and I want to share with you information that is likely to improve your overall health. It is impressive.

We all share a fundamental cause of disease which is oxidative stress. Please read and watch to learn how Protandim reduces oxidative stress by removing free radicals.

There are an unlimited number of things that lead to oxidative stress in our bodies. Oxidative stress is the result of free radicals. Free radicals lead to disease in many forms. If oxidative stress can be reduced at a cellular level then current and or future disease processes are likely to be reduced and or reversed. It is possible to dramatically improve your oxidative stress with a non prescription product called Protandim.

My 6'8" son, at the age of 16, former AAU traveling basketball player, had viral meningitis in May 2011. After recovering from the infection he seemed okay but on day 14 at a basketball camp he collapsed on a gym floor with overwhelming fatigue. During the next 2 years we learned that the viral episode caused POTS disease (Postural orthostatic tachycardia syndrome). He had extreme exhaustion that whole time period. I am convinced that viral injury causing oxidative stress in his body brought on POTS. We were told by Clev. Clin. neurology, in general POTS disease will either stay the same, improve over the next 10 years or progress the rest of his life. He was given a prescription to retain water but that led to a kidney stone. Another medication was prescribed but with minimal improvement of POTS symptoms but then made worse. I learned about Protandim from some doctor friends, I ordered a year supply that very night. My son started taking Protandim on 6.24.2013. Due to the urgency my wife and I felt regarding his situation and the possibility of not even going to college, we suggested my son take Protandim 2 times-a-day: one in the morning and one at night to ramp up the anti-inflammatory and Nrf2 effect to help his immune system. In only 8 days after taking the 2 Protandim he has had significant improvement. Previously, he was unable to run the gym floor without collapsing and his typical daily activities were exhausting, but now he is starting to jog and run again. He is some much healthier it is near unbelievable. He has gone on to complete college and on to a physical demanding career. I have shared this story with hundreds of other people, many have used the Protandim and improved their health. Some folks were sick all the time and now they stay well!!!!

There are many other personal testimonies' of the dramatic healing effects of Protandim. Just remember the science community is learning that the common denominator to most diseases is oxidative stress leading to cellular inflammation and damage to your DNA.

Protandim can help and is worth trying. Please read the attached fliers. Protandim is about \$50 for 1 month supply, at one pill/day and sold through individual distributors or sold online and mailed to you. You may purchase from me by visiting www.mylifevantage.com/DrCrouch and just start shopping. Once you are the web site, click shop and scroll down to Protandim and select. If you wish to sell Protandim, the join at my site as a distributor. Otherwise you may contact my office to purchase and pick it up for \$55. There is a business side to this as well.

Remember, Paul Harvey always said, "the best form of advertising is by word of mouth". At LifeVantage both preferred customers and independent distributors are the brick and mortar of the company. Preferred customers can sign up other people to purchase Protandim and obtain a discount for themselves. Individual distributors can sign up other people to purchase Protandim that works toward a commission. Either way every little bit helps.

As for me, I am a distributor because I bought a year supply for my son. It does not matter to me who you purchase it from. I am a physician and I am convinced that maintaining a normal oxidative stress equilibrium is the key to optimizing your health.

Most importantly Protandim will reduce your oxidative stress, begin up-regulation or down-regulation of genes to repair your DNA through Nrf2 activation to improve your health. Protandim so dramatically improved my sons' health and wellbeing and that as a physician I am compelled to share it with you.

Guidelines:

1. Do not take it if you have an allergic reaction to: Milk thistle, Bacopa, Ashwagandha, Green tea, Turmeric;
2. Do not take more of these items in the same time period as the Protandim as it can overload a metabolic pathway. For ex. If you want Green tea, enjoy it 4 hours later.
3. Persons having had organ transplantation should consult with their doctor for supervision due to its marked enhanced immune results. Transplant patients are using Protandim.
4. No drug interactions have been encountered.

Sincerely,

Dr. Adam Crouch

Take some time and look up Nrf2 online at PubMed.gov a see what it says about oxidative stress and other diseases.

Wishing you the best in health
